

## WEEKLY TASK

### Week 1

Read the project documentation carefully and make a clear understanding about functional requirements. Make a structure for all modules.

- Create a Node.js Express project.
- Design layout for the Tutor panel (refer to the Mockup diagram which we gave).  
You can use templates for your web pages, else you can design pages.
- Establish Mongodb Database connectivity.
- Complete login and logout module for Tutor (Username and Password can be predefined in database)
